Profile Summary

Creative and detail-oriented Frontend Developer passionate about building modern, responsive, and user-centric web applications. Skilled in React.js, Tailwind CSS, and REST API integration, with a strong eye for design and performance optimization. Adept at transforming wireframes into functional, interactive digital experiences that enhance usability and engagement. Looking to contribute to a forward-thinking organization that values innovation and clean, maintainable code.

Technical Skills

Frontend Development	HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS
Design & Tools	Figma, Canva
Additional Tools	Git, GitHub, REST API, LocalStorage, Theme Switcher & Dark Mode

Projects Portfolio

- Buynest – Full E-Commerce Platform: Built with React.js and Tailwind CSS using LocalStorage. Features include product filters, categories, cart management, checkout, and dark/light mode.
- Product Finder Website: Developed using React.js and REST APIs for real-time product search with optimized UI and error handling.
- Personal Portfolio Website: Minimalist portfolio showcasing projects and skills with responsive design and animations.
- Greadian Page (Full Stack): Full-stack project with React.js, Node.js, Express, and MongoDB, implementing authentication and color theme management.
